- TAADNext will include del/dup for *SMAD4* and *TGFB3* genes
- FHNNext will include del/dup for *APOB* and *PCSK9* genes

DID YOU GNOME?

Tiana M. Adams, PA-C, MBA, is a Clinical Oncology Operations Specialist in our Medical Affairs department. She wears many hats, from liaising with payors to researching the cost-benefit impact of new medical initiatives.

Before joining Ambry,

Tiana worked for 18 years in the clinic as a physician assistant and completed her MBA. She continues to see patients, from time to time, in the urgent care setting because she loves working with patients and families. Tiana's busy work schedule means she makes the most of her spare time - you'll find her rooting for her stepson at football games, cheering her daughter on at track meets or spoiling her two grandchildren.

EDUCATION

AmbrySpeaks Tour

Beginning on January 31, Ambry will host a series of special events across the United States to discuss accuracy and innovation in the era of collaborative genetics. Get details and RSVP [here](#).

New Oncology Research

Recent research with our collaborators on hereditary breast cancer and male breast cancer has implications for your clinical practice. Find out how by reading the blog posts [here](#).

New and Updated Oncology Resources

Find them all [here](#).

INSURANCE

Time-Saving Tip

Including the ICD-10 diagnosis code with your test order - with the highest level of specificity, if possible - avoids paperwork delays and call-backs.

COMMUNITY OUTREACH

Ambry Elves Deliver

The Ambry team came together to fundraise and give more than 250 gifts to patients at Children's Hospital of Orange County and Children's Hospital of Los Angeles. 6 families were also provided a night out: an all-expense paid dinner and gifts for all family members!
