

Cardiogenetics Testing

Reference Guide

Why Choose Ambry

Approximately 1 in 60 people have a hereditary cardiovascular condition.^{1,2} Ambry's mission is to provide the most advanced genetic testing information available to help you identify those at-risk and determine the best treatment options. If we know a patient has a disease-causing genetic change, not only does it mean better disease management, it also indicates that we can test others in the family and provide them with potentially life-saving information.

Diseases and Testing Options

* Genes associated with Left Ventricular Non-Compaction (LVNC) are included in DCMNext.

Targeted Panels Gene Comparison

All panels have a turnaround time of 2-3 weeks

ARRHYTHMIAS

CARDIOMYOPATHIES

Comprehensive, Targeted, and Custom Panels Gene Lists

All panels have a turnaround time of 2-3 weeks

CardioNext 92 genes		TAADNext 35 genes	NoonanNext 18 genes	FHNext 4 genes + SNP
ABCC9	LAMA4	ACTA2	BRAF	APOB
ACTC1	LAMP2	BGN	CBL	LDLR
ACTN2	LDB3	CBS	HRAS	LDLRAP1

FCSNext 5 genes
APOA5
APOC2
GPIHBP1
LMF1
LPL

Sitosterolemia 2 genes
ABCG5
ABCG8

Additional genes available for CustomNext-Cardio
ABCA1
APOC3
APOE
CYP27A1
GAA
GATA4
JAG1
LCAT
LIPA
TBX1

CustomNext-Cardio allows you to choose your own combination of up to 167 genes.

* Optional

Moving Science Forward

No-cost Family Variant Testing

No-cost testing for all blood relatives is now available within 90 days of the original report if the proband was tested at Ambry. Family testing is done via specific site analysis for pathogenic or likely pathogenic variants. (Excludes SNP array and applies to single gene, panel or exome testing.)

Flexible Sample Options

Ambry accepts blood, saliva and other sample types to perform genetic testing.

Sample for Life

We periodically review variants and let you know when there is updated information, such as a reclassification. This is part of our commitment to finding answers.

Additional Genes for Better Care

Post-reporting, clinicians can add-on additional cardiology genes or panels to be analyzed at no cost, within 90 days of the original cardiogenetic test and without the need for a new sample.

About Ambry

Ambry Genetics, a subsidiary of REALM IDx, Inc., excels at translating scientific research into clinically actionable test results based on a deep understanding of the human genome and the biology behind genetic disease. Ambry has an unparalleled track record of discoveries over 20 years and a database that continually expands through collaboration with academic, corporate and pharmaceutical partners. Being first to market with innovative products and comprehensive analysis, Ambry enables clinicians to confidently inform patient health decisions. For more information, please visit ambrygen.com.
