

Hereditary Cancer Portfolio Overview

Setting the Standard in Genetic Testing

OVER 25 YEARS OF INNOVATION AND DISCOVERIES

+RNAinsight[®]

+RNAinsight[®] is Ambry's unmatched concurrent DNA/RNA hereditary cancer testing that delivers greater clarity and confidence in results and finds more positive patients who may otherwise be missed with DNA-only or reflexive RNA approaches.¹⁻²

1-90 Genes

For Maximum Flexibility

Order +RNAinsight with analysis of any genes on the hereditary cancer menu*

5%

Of Hereditary Cancer Cases Leverage RNA Data

RNA data can benefit all Ambry patients, even those with DNA-only testing¹

1/25

Positive Patients Would Be Missed Without RNA

Results without +RNAinsight would be negative or inconclusive²

~6%

Reduction in Relative VUS Rate

+RNAinsight reduces ambiguity for providers and patients**

12,000+

Non-White Patients Have Benefited

+RNAinsight provided functional data to address known data gaps**

Technical Details +RNAinsight analyzes transcripts for up to 90 genes depending on which Ambry Genetics DNA-based Hereditary Cancer Panel it is paired with, and depending on the absence or presence of RNA transcripts expressed in the blood. The results from +RNAinsight are used to provide functional RNA information to further support classification of DNA variants. It is not intended to be used as a stand-alone diagnostic test.

Turnaround Times
 BRCAPlus: 4-7 days
 CancerNext, CancerNext-Expanded, BRCANext, ColoNext: 5-14 days

^ Add-on Options
BRCANext (19-gene base panel)
 Limited Evidence Genes (7): *ATRIP, CDC73, FH, NTHL1, POLD1, POLE, RAD51B*

ColoNext (21-gene base panel)
 Limited Evidence Genes (5): *ATM, CHEK2, CTNNA1, MLH3, RNF43*

CancerNext-Expanded (77-gene base panel)
 Limited Evidence Genes (8): *ATRIP, EGLN1, KIF1B, MLH3, PALLD, RAD51B, RNF43, TERT*
 Pancreatitis Genes (5): *CFTR, CPA1, CTRC, PRSS1, SPINK1*

Limited evidence gene available as part of an add-on selection to a test. There is limited evidence to support a causal role for this gene in association with cancer predisposition.

^^ Additional CustomNext-Cancer Genes
 Limited Evidence Genes (Choose from 8): *ATRIP, EGLN1, KIF1B, MLH3, PALLD, RAD51B, RNF43, TERT*
 Pancreatitis Genes (Choose from 5): *CFTR, CPA1, CTRC, PRSS1, SPINK1*

+RNAinsight can be added to any multigene hereditary cancer test with exception of BRCAPlus. [See front page for details.](#)

Excellent Coverage, Personalized Support

At Ambry, we understand that there is no “one-size-fits-all” in healthcare. We will work with your patients’ insurance coverage and provide options for accessing our high-quality genetic testing based on your patients’ individualized needs.

Financial Assistance Program

-  If your patient needs help with the cost of testing, they can request support through our Financial Assistance Program (FAP). The FAP considers their individual financial situation and provides personalized payment options based on a personalized assessment of their financial need.
-  Have your patients call or email our Billing Support team at +1 949-900-5795 or billing@ambrygen.com with any questions.

Let us be your trusted partner

All hereditary cancer tests utilize Ambry’s Classifi® program, a proprietary, knowledge-driven engine for gene classification, variant analysis & interpretation, and reporting. The Classifi program delivers the highest quality test results and ensures we leave no stone unturned in getting answers for you and your patients.
