

Understanding Your Positive *CDK4* Genetic Test Result

INFORMATION FOR PATIENTS WITH A PATHOGENIC OR LIKELY PATHOGENIC VARIANT

5 Things To Know

1	Result	Your testing shows that you have a pathogenic or likely pathogenic variant in the <i>CDK4</i> gene.
2	<i>CDK4</i> -related melanoma predisposition	People with a pathogenic or likely pathogenic <i>CDK4</i> variant have <i>CDK4</i> -related melanoma predisposition.
3	Cancer risks	You have an increased chance to develop atypical moles and melanoma (skin cancer).
4	What you can do	Risk management decisions are very personal. There are options to detect cancer early or lower the risk to develop cancer. It is important to discuss these options with your healthcare provider and decide on a plan that works for you.
5	Family	Family members may also be at risk—they can be tested for the pathogenic or likely pathogenic <i>CDK4</i> variant that was identified in you. It is recommended that you share this information with your family members so they can learn more and discuss with their healthcare providers.

CDK4 in the Family

There is a 50/50 random chance to pass on a pathogenic or likely pathogenic *CDK4* variant to each of your children.

■	Has a pathogenic or likely pathogenic <i>CDK4</i> variant	■	No pathogenic or likely pathogenic <i>CDK4</i> variant

Please discuss this information with your healthcare provider. The cancer genetics field is continuously evolving, so updates related to your *CDK4* result, medical recommendations, and/or potential treatments may be available over time. This information is not meant to replace a discussion with a healthcare provider, and should not be considered or interpreted as medical advice.
