

## QUESTIONS FOR PATIENTS

What is your family history?

How did you arrive at your diagnosis?

How did you find your GC?

What was your experience like with your GC?

Tell us about your journey with HBOC.

What would this process have been like without a GC?

## QUESTIONS FOR GCs

How did you first meet your patient?

Why do they stand out in your mind?

Did you catch something your doctor missed or change their diagnosis in any way?

In working with you patient did you identify someone else in their family with a mutation?

How has this patient impacted you as a GC and as a person?

Is there anything else about this patient that you would like to share?
